ADDITIONAL ITEMS COMMONLY MISSED

SACRIFICIAL ANODE REPLACEMENT ON STERNDRIVE I/O BOATS	
The reason these anodes are called "sacrificial" is because once the electric current from the water attacks the weaker metal anode it can be replaced easily instead of damaging more important and expensive parts. (such as the aluminum housing and steel props)	
The number of anodes per boat differ with pricing ranges from \$150.00 to \$275.00
