

National Heavy Equipment Show Booth 5201

Think this looks different? You're right. There's nothing else like it!

The *green line* 305 Multihandler is the world's first telehandler with a hydraulic hi-rise cab, elevating operations to an eye level of 13.3 feet (4 meters) and reaches heights up to 24 feet (7.3 meters) with a load capacity of over 11,000 lbs. (5 tonnes).

- No electronics to troubleshoot or service
- It picks, carries, hoists, loads, pushes, piles and hustles like no machine you've seen before
- It lifts like a loader, reaches like a teleboom and runs like a top to move more material more ways than you ever thought possible
- Its elevating cab gives a better look at where you're going and what you're moving than any other loader can
